

PIONEER VILLAGE CRYPTOGRAM

A cryptogram is a word puzzle in which each letter of the alphabet has been replaced by a number. The numbers aren't in order, so some work is involved in figuring out the message.

- First, see if you can solve any of the smaller words like 'and' or 'the'.
- Look at the numbers that repeat throughout the message, and see if you can figure out what letters those stand for.
- Use the table to help you keep track of which letters are solved.
- Mostly, cryptograms are solved by trial and error. If you stick with it, you'll get it in no time!
- Good Luck!
